

**CRESTWOOD**  
COMMUNITY SCHOOL

## **Supporting Students with Medical Needs Policy**

---

<b>Name of School:</b>	<b>Crestwood Community School</b>
<b>Name of Headteacher:</b>	<b>Krista Dawkins</b>
<b>Date Policy approved and adopted:</b>	<b>May 2019</b>
<b>Date Due for review:</b>	<b>May 2022</b>

## Introduction

Section 100 of The Children and Families Act 2014 places a duty on the governing body of this school to make arrangements for supporting children at their premise with medical conditions. The Department of Education have produced statutory guidance ‘Supporting Students with Medical Conditions’ and we will have regard to this guidance when meeting this requirement.

We will endeavour to ensure that children with medical conditions are properly supported so they have full access to education, including school trips and physical education. The aim is to ensure all children with medical conditions, in terms of both their physical and mental health, are properly supported in school so they can play a full and active role in school life, remain healthy and achieve their academic potential.

It is our policy to ensure all medical information will be treated confidentially by the Headteacher and staff. All administration of medicines is arranged and managed in accordance with the Supporting Students with Medical Needs document. All staff have a duty of care to follow and co-operate with the requirements of this policy.

Where children have a disability, the requirement of the Equality Act 2010 will apply.

Where children have an identified special need, the SEN Code of Practice will also apply.

We recognise that medical conditions may impact social and emotional development as well as having educational implications.

## Key Roles & Responsibilities

**Statutory Requirement: The governing body should ensure that the school’s policy clearly identifies the roles and responsibilities of all those involved in the arrangements they make to support children at school with medical conditions.**

**Key Roles and Responsibilities**

#### The Governing Body:-

- must ensure the school's policy clearly identifies the roles and responsibilities of all those involved in the arrangements they make to support Students at school with medical conditions;
- must make arrangements to support Students with medical conditions in school, including making sure that a policy for supporting Students with medical conditions in school is developed and implemented;
- should ensure sufficient staff have received suitable training and are competent before they take on responsibility to support children with medical conditions;
- will ensure Students with medical conditions are supported to enable the fullest participation possible in all aspects of school life;
- should ensure any members of school staff who provide support to Students with medical conditions are able to access information and other teaching support materials as needed.

#### The Head teacher:-

- should ensure the school's policy is developed and effectively implemented with partners. This includes ensuring all staff are aware of the policy for supporting Students with medical conditions and understand their role in its implementation;
- should ensure all staff who need to know are aware of the child's condition and that sufficient trained numbers of staff are available to implement the policy and deliver against all individual healthcare plans, including in contingency and emergency situations. This may involve recruiting a member of staff for this purpose;
- has overall responsibility for the development of individual healthcare plans;
- ensure school staff are appropriately insured and are aware that they are insured to support Students in this way. The school nursing service should be contacted in the case of any child who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse.

#### The Parent:-

- should provide the school with sufficient and up-to-date information about their child's medical needs. They may in some cases be the first to notify the school that their child has a medical condition. Parents are key partners and should be involved in the development and review of their child's individual healthcare plan, and may be involved in its drafting. They should carry out any action they have

agreed to as part of its implementation, e.g. provide medicines and equipment and ensure they or another nominated adult are contactable at all times.

The Student :-

- with medical conditions will often be best placed to provide information about how their condition affects them. They should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan. Other Students will often be sensitive to the needs of those with medical conditions.

The School Matron:-

- will be asked to provide support to Students with medical conditions, including the administering of medicines. School staff should receive sufficient and suitable training and achieve the necessary level of competency before they take on responsibility to support children with medical conditions. Any member of school staff should know what to do and respond accordingly when they become aware that a Student with a medical condition needs help. Although administering medicines is not part of teachers' professional duties, they should take into account the needs of Students with medical conditions that they teach.

## Local Arrangements

### Identifying children with health conditions

**Statutory Requirement: The Governing body will ensure that the policy sets out the procedures to be followed whenever a school is notified that a Student has a medical condition.**

We will aim to identify children with medical needs on entry to the school by working in partnership with parents/ carers and following the process outlined in the document 'Process for identifying children with a health condition' produced by the Southern Health School Nursing Team in conjunction with the Children's Services Health and Safety Team. We will use the 'Health Questionnaire for Schools' to obtain the information required for each child's medical needs to ensure that we have appropriate arrangements in place prior to the child commencing at the school to support them accordingly.

Where a formal diagnosis is awaited or is unclear, we will plan to implement arrangements to support the child, based on the current evidence available for their condition. We will ensure that every effort is made to involve some formal medical evidence and consultation with the parents.

## Individual health care plans

**Statutory Requirement: The Governing body will ensure that the school's policy covers the role of individual healthcare plans, and who is responsible for their development in supporting children at school with medical conditions.**

We recognise that Individual Healthcare Plans are recommended in particular where conditions fluctuate or where there is a high risk that emergency intervention will be needed, and are likely to be helpful in the majority of other cases, especially where medical conditions are long term and complex. However, not all children will require one. The school, healthcare professional and parent will agree based on evidence when a healthcare plan would be inappropriate or disproportionate.

Where children require an individual healthcare plan it will be the responsibility of the School Matron to work with parents and relevant healthcare professionals to write the plan.

If a child is returning following a period of hospital education or alternative provision (including home tuition), we will work with Hampshire County Council and the education provider to ensure that the individual healthcare plan identifies the support the child will need to reintegrate effectively.

Where possible and in discussion with parents/carers, children who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be recorded in their healthcare plan. The healthcare plan will reference what will happen should a child who self-administers refuse to take their medication – this will normally be informing the parent/carer as soon as possible.

A healthcare plan (and its review) may be initiated in consultation with the parent/carer, by a member of school staff or by a healthcare professional involved in providing care to the child. The School Matron will work in partnership with the parents/carer, and a relevant healthcare professional eg. school, specialist or children's community nurse, who can best advise on the particular needs of the child to draw up and/or review the plan. Where a child has a special educational need identified in a statement or Educational Health Care (EHC) plan, the individual healthcare plan will be linked to or become part of that statement or EHC plan.

We may also refer to the flowchart contained within the document 'Process for identifying children with a health condition' for identifying and agreeing the support a child needs and then developing the individual healthcare plan.

We will use the individual healthcare plan template produced by the DfE to record the plan.

If a child is returning following a period of hospital education or alternative provision (including home tuition), that we will work with Hampshire County Council and education provider to ensure that the individual healthcare plan identifies the support the child will need to reintegrate effectively.

**Statutory Requirement: The governing body should ensure that all plans are reviewed at least annually or earlier if evidence is presented that the child's needs have changed.**

**Plans should be developed with the child's best interests in mind and ensure that the school assesses and manages the risks to the child's education, health and social well-being and minimise disruption.**

Initial healthcare plans are created on admission and reviewed in the Autumn term annually, unless advised by parents/carers or health care professionals that the child's needs have changed.

**Statutory Requirement: When deciding what information should be recorded on individual healthcare plans, the governing body should consider the following:**

- The child's name, address and date of birth
- Information about the medical condition
- Information regarding signs and symptoms
- Information regarding drugs, dosage & timings
- Support required for the Student's educational, social and emotional needs
- The child's Parent/Carer's contact details with at least one back up contact.
- Contact information for any Health Care professionals involved.
- Information about what constitutes an emergency for the child
- Information about what to do in an emergency.

The form at Appendix 3 will be used to record this information.

### **Staff training**

**Statutory Requirement: The Governing Body should ensure that this policy clearly sets out how staff will be supported in carrying out their role to support children with medical conditions, and how this will be reviewed. It should specify how training needs will be assessed and by whom training will be commissioned and provided.**

**The school policy should be clear that any member of school staff providing support to a child with medical needs should have received suitable training.**

**Staff must not administer prescription medicines or undertake any health care procedures without the appropriate training (updated to reflect any individual healthcare plans)**

All new staff will be inducted on the policy when they join the school through inset days and induction sessions. The policies are also available on Google drive. Staff sign a "Staff Procedures for Injury or Illness" form to acknowledge that they have received information and training. Records of this training will be stored in the medical room on Shakespeare Road campus.

All nominated staff will be provided awareness training on the school's policy for supporting children with medical conditions which will include what their role is in implementing the

policy. This training will be carried out annually in the Autumn term and/or following a review of the policy.

The awareness training will be provided to staff by healthcare professionals where necessary.

We will retain evidence that staff have been provided the relevant awareness training on the policy by minutes of meetings/signature sheets.

Where required we will work with the relevant healthcare professionals to identify and agree the type and level of training required and identify where the training can be obtained from. This will include ensuring that the training is sufficient to ensure staff are competent and confidence in their ability to support children with medical conditions. The training will include preventative and emergency measures so that staff can recognise and act quickly when a problem occurs and therefore allow them to fulfil the requirements set out in the individual healthcare plan.

Any training undertaken will form part of the overall training plan for the school and refresher awareness training will be scheduled at appropriate intervals agreed with the relevant healthcare professional delivering the training.

A 'Staff training record– administration of medicines' form will be completed to document the type of awareness training undertaken, the date of training and the competent professional providing the training.

### The child's role

**Statutory Requirement: The Governing body will ensure that the school's policy covers arrangements for children who are competent to manage their own health needs and medicines.**

Where possible and in discussion with parents, children who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be recorded in their individual healthcare plan. The healthcare plan will reference what will happen should a child who self-administers refuse to take their medication (this will normally be informing the parent/carer at the earliest opportunity).

Medicines will be stored securely in the medical room. Students should not carry medication on them except for asthma inhalers or epipens.

### Managing medicines on School Premises

**Statutory Requirement: The Governing Body will ensure that the school's policy is clear about the procedures to be followed for managing medicines.**

The administration of medicines is the overall responsibility of the parents/carers. Where clinically possible we will encourage parents to ask for medicines to be prescribed in dose frequencies which enable them to be taken outside of school hours. However, the headteacher is responsible for ensuring children are supported with their medical needs whilst on site, therefore this may include managing medicines where it would be detrimental to a child's health or school attendance not to do so.

We will not give prescription or non-prescription medicines to a child under 16 without their parent's/carers written consent (a 'parental agreement to administer medicines' form Appendix 4) will be used to record this), except in exceptional circumstances where the medicine has been prescribed to the child without the knowledge of the parents. In such cases, we will make every effort to encourage the child or young person to involve their parents while respecting their right to confidentiality.

A documented tracking system to record all medicines received in and out of the premises will be put in place. The tracking system used is the Children's Services Medication Tracking Form (appendix 2).

The name of the child, dose, expiry and shelf life dates will be checked before medicines are administered.

On occasions where a child refuses to take their medication the parents will be informed at the earliest available opportunity.

We will only accept prescribed medicines which are in date, labelled, provided in the original container as dispensed by the pharmacist and include instructions for administration, their dosage and storage. Insulin is the exception, which must still be in date but will generally be available to schools inside an insulin pen or a pump, rather than its original container.

Children who are able to use their own inhalers themselves are encouraged to carry it with them. If the child is too young or immature to take personal responsibility for their inhaler, staff should make sure that it is stored in a safe but readily accessible place, and clearly marked with the child's name. Spare inhalers should be sent in to be stored in school in case the child forgets theirs. We also have an emergency inhaler kit which can be used with written consent from the parent/carer as detailed in our Asthma Policy.

Controlled drugs will be securely stored in a non-portable container which only named staff will have access to. We will ensure that the drugs are easily accessible in an emergency situation. A record will be kept of any doses used and the amount of the controlled drug held in school. There may be instances where it is deemed appropriate for a child to administer their own controlled medication. This would normally be at the advice of a medical practitioner.

We will only administer non-prescribed medicines on request from the parent if they are in clearly identifiable packaging and only on a short term basis (Where the school have concerns they will seek further guidance from their link School Nurse).

It is our policy to give age appropriate doses of paracetamol to secondary age children as described on the packet, if written consent from the parents has been received in advance. We will check that they have not previously taken any medication containing paracetamol within the preceding 4 hours and only give one dose.

We will never administer aspirin or medicine containing Ibuprofen to any child under 16 years old unless prescribed by a doctor.

All other pain relief medicine will not be administered without first checking maximum dosages and when previously taken. We will always inform parents.

Any homeopathic remedies to be administered will require a letter of consent from the child's doctor and will be administered at the discretion of the Head teacher.

Emergency medicines will be stored in a safe location but not locked away to ensure they are easily accessible in the case of an emergency.

Types of emergency medicines include:

- Injections of adrenaline for acute allergic reactions
- Inhalers for asthmatics
- Injections of Glucagon for diabetic hypoglycaemia

Other emergency medication ie. Rectal diazepam or Buccal Midazolam for major seizures will be stored in accordance with the normal prescribed medicines procedures (see storage section).

## **Storage**

All medication other than emergency medication will be stored safely in a locked cabinet, where the hinges cannot be easily tampered with and cannot be easily removed from the premise.

Where medicines need to be refrigerated, they will be stored in a dedicated refrigerator in the medical room on the appropriate campus in a clearly labelled airtight container. There must be restricted access to a refrigerator holding medicines.

Children will be made aware of where their medicines are at all times and be able to access them immediately where appropriate. Where relevant they should know who holds the key to the storage facility.

Medicines such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to children and not locked away. We will also ensure that they are readily available when outside of the school premises or on school trips.

Storage of medication whilst off site will be maintained at steady temperature and secure. There will be appropriately trained staff present to administer day to day and emergency

medication and copies of individual health care plans will be taken off site to ensure appropriate procedures are followed.

### **Disposal**

It is the responsibility of the parents/carers to dispose of their child's medicines. It is our policy to return any medicines that are no longer required including those where the date has expired to the parents/carers. Parents/carers will be informed of this when the initial agreements are made to administer medicines. Medication returned to parent/ carers will be documented on the tracking medication form.

We would normally expect parents/carers to provide sharps boxes for the disposal of needles, however, if necessary we will arrange for sharps boxes. The collection and disposal will be arranged locally through the contractor employed to dispose of medical waste (currently Cannon) who will remove them from the site as required.

### **Medical Accommodation**

The medical room on both campuses will be used for all medical administration/treatment purposes. The room will be available at all times.

### **Record keeping**

**Statutory Requirement: The governing body should ensure that written records are kept of all medicines administered to children**

A record of what has been administered including how much, when and by whom, will be recorded on a 'record of prescribed medicines' form (appendix 5). The form will be kept on file. Any possible side effects of the medication will also be noted and reported to the parent/carers.

### **Emergency Procedures**

**Statutory Requirement: The Governing body will ensure that the school's policy sets out what should happen in an emergency situation..**

Where a child has an individual healthcare plan, this will clearly define what constitutes an emergency and provide a process to follow. All relevant staff will be made aware of the emergency symptoms and procedures. We will ensure other children in the school know what to do in the event of an emergency ie. informing a teacher immediately if they are concerned about the health of another child.

Where a child is required to be taken to hospital, a member of staff will stay with the child until their parents arrives, this includes accompanying them to hospital by ambulance if necessary (taking any relevant medical information, care plans etc that the school holds).

Appendix 7 details the emergency procedure.

### **Day trips/off site activities**

**Statutory Requirement: *The Governing body should ensure that their arrangements are clear and unambiguous about the need to support actively Students with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.***

We will ensure that teachers are aware of how a child's medical condition will impact on their participation in any off site activity or day trip, but we will ensure that there is enough flexibility for all children to participate according to their own abilities within reasonable adjustments.

We will consider what reasonable adjustments we might make to enable children with medical needs to participate fully and safely on visits. We will carry out a risk assessment so that planning arrangements take account of any steps needed to ensure that Students with medical conditions are included. We will consult with parents and Students and advice from the relevant healthcare professional to ensure that Students can participate safely.

#### **Other issues**

Home-to-school transport – where this is the responsibility of local authorities, we will ensure that drivers are aware of a Student's individual healthcare plan and what it contains, especially in respect of emergency situations. We will ensure our school minibus driver is aware of any healthcare plans relating to students using the minibus.

Defibrillators – Crestwood Community School has 3 defibrillators located in the medical rooms on both campuses, and the sports hall on the Shakespeare Road campus. Staff members appointed as first-aiders are trained in the use of CPR.

Asthma inhalers – there is a separate policy for the use of asthma inhalers in school.

#### **Unacceptable practice**

**Statutory Requirement: The governing body will ensure that the school's policy is explicit about what practice is not acceptable.**

Staff are expected to use their discretion and judge each child's individual healthcare plan on its merits, it is not generally acceptable practice to:

- prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary;
- assume that every child with the same condition requires the same treatment;
- ignore the views of the child or their parents; or ignore medical evidence or opinion (although this may be challenged);

- send children with medical conditions home frequently or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans;
- if the child becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable;
- penalise children for their attendance record if their absences are related to their medical condition, eg. hospital appointments;
- prevent Students from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively;
- require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their child, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs; or
- prevent children from participating, or create unnecessary barriers to children participating in any aspect of school life, including school trips eg. by requiring parents to accompany the child.

### **Liability and Indemnity**

**Statutory Requirement: The governing body will ensure that the appropriate level of insurance is in place and appropriately reflects the level of risk.**

Staff at the school are indemnified under the County Council self-insurance arrangements.

The County Council is self-insured and have extended this self-insurance to indemnify school staff who have agreed to administer medication or undertake a medical procedure to children. To meet the requirements of the indemnification, we will ensure that staff at the school have parents' permission for administering medicines and members of staff will have had training on the administration of the medication or medical procedure.

### **Complaints**

**Statutory Requirement: The governing body will ensure that the school's policy sets out how complaints may be made and will be handled concerning the support provided to Students with medical conditions.**

Should parents or children be dissatisfied with the support provided they can discuss their concerns directly with the Headteacher. If for whatever reason this does not resolve the issue, they may make a formal complaint via the school's complaints procedure.

# Standard Risk Assessment:

---

---

## Appendix 1

Activity	Administration of Medicines	Date of Assessment
Location		Date of Review
Name of Risk Assessor		Risk assessment subject to.

This risk assessment template can be used for specialist areas where a model template does not exist.

**Instructions for Use:** This blank risk assessment should be used for any area where there is not already a template risk assessment in place. You will need to ensure that you have identified the common hazards and recognised those people who could be at risk and whether they have any individual requirements. Consider all of the standard controls i.e. those things you need to do to reduce the risk and then confirm all of the standard controls are in place. Check if there is anything further that you may need to do. If all of these components are completed the level of risk for these hazards will have been reduced to the lowest acceptable level. An action plan should be completed if further mitigation is required following the assessment.

**Original risk assessments must be kept for a period of 7 years. On completion a hard copy should be printed off and placed in your local/site health and safety folder.**

**This document should be filed under Hantsfile under Health and Safety Risk Assessment**

### Administration of Medicines Risk Assessment Guidance

The Supporting Students with Medical Needs document produced by the DfE and published in September 2014 for implementing into schools, includes the provision of administration of medicines to Students.

The school Governors must ensure that a local policy on supporting Students with medical needs is produced and implemented in the school.

This risk assessment should be completed as part of the process to assist in identifying the specific hazards and control measure that need to be put in place to ensure medication is administered, managed and stored safely and effectively in schools by competent staff.

The hazards and controls measures have been entered into the form however, schools must ensure that they complete the second box titled "Who Might be Harmed and How" by identifying who at the school may be harmed by the hazard, eg. children with medical needs and in same box you should be considering how they might be harmed, ie. what the risk is from the identified hazard and enter this information into the same box.

You must then review the control measures that have already been entered in to the third box and enter into the box titled "Do you need to do anything else to manage the risk" any further measures that need to be implemented locally to ensure that the control measures are met and therefore the risk reduced to a manageable level. If anything else is identified locally to manage the risk the following boxes "Action by Whom", "Action by When" and "Done" must also be completed. The information should then be transferred onto the action plan at the end of the risk assessment form and used as a live document until all actions have been completed.

An example has been entered in its entirety to demonstrate how to completed the form correctly. If this process is followed for all the identified hazards correctly the level of risk should be reduced to lowest possible point.

Once the risk assessment is complete and to ensure that is effective it should be shared with all relevant staff and reviewed periodically.

What are the hazards?	Who might be harmed and how?	What are you already doing?	Do you need to do anything else to manage this risk?
<p><b><u>Policy/Procedures</u></b></p> <p>Lack of policy/procedures</p> <p>Lack of clarity and staff awareness of policy and procedures</p> <p>Failure to follow policy/procedures</p>		<p>Local administration of medicines policy documented for premises</p> <p>Administration of medicines policy provided to staff at induction and periodically thereafter</p> <p>Investigation procedure in place in the event of failure e.g. refresher training, disciplinary procedures or review of policy</p>	
<p><b><u>Training</u></b></p> <p>Lack of awareness training to safely administer medicines e.g. asthmas, epi-pen etc.</p> <p>Lack of awareness training in control and storage of medication</p> <p>Lack of specific awareness training to meet individual needs of children on the premises</p>		<p>Periodic awareness training provided for medical conditions such as asthma or epi-pen etc. by a competent person e.g. school nurse or other medical professional</p> <p>Induction awareness training on local storage procedures and periodic refresher information provided (annually) to relevant staff e.g. policy/procedures</p> <p>Questionnaire (provided by School Nursing Team) to be completed by parents/guardian for Students on admission to school to ensure medical needs are identified</p> <p>Periodic training provided for specific medical conditions by competent person e.g. school nurse or other medical professional</p>	
<p><b><u>Administration</u></b></p>			

<p>Incorrect dosage given</p> <p>Incorrect Student given medication</p> <p>Out of date medication administered</p>		<p>Medication to be provided in the original container/labelled with the name of the appropriate Student and dose required</p> <p>Local procedure for checking name and dosage on medication prior to administration</p> <p>Part of local procedure should be to review expiry date prior to administering medication</p>	
<p><b><u>Controlled Drugs</u></b></p> <p>Any specific procedures</p>		<p>Only trained staff to administer medication</p>	
<p><b><u>Storage</u></b></p> <p>No locked cabinet or room in use/available prescribed medicines and controlled drugs not locked away e.g. stored in pigeonholes</p> <p>No secure refrigerator available/in use</p> <p>Medicines not in original containers or clearly labelled</p>		<p>Locked cabinet (not easily removable) or lockable room for use of storing all medication</p> <p>Ideally a dedicated refrigerator should be used which is in a secure location. If a normal refrigerator is used medicine must be stored in a separate sealed container and clearly labelled</p> <p>Medicines to be provided in the original container labelled with the name of the appropriate Student</p> <p>All emergency medicines (asthma inhalers, epi-pens etc.) readily available and not locked away.</p>	

<p>Emergency medicines locked away</p>			
<p><b>Consent</b></p> <p>Lack of parents consent</p> <p>Inappropriate person providing consent</p> <p>Limited information on consent form (leading to lack of clarity)</p> <p>Formal consent forms not used</p>		<p>Parental consent forms to be completed using standard template, provided by department and fully completed by a parent or guardian of child only, providing all relevant information requested</p>	
<p><b><u>Health Care Plans</u></b></p> <p>School unaware that child has health issues requiring monitoring in school</p> <p>No health care plans in place</p> <p>Lack of involvement of family and health care professionals</p> <p>Lack of awareness of health care plan by relevant staff</p>		<p>Process in place for identifying a child who has health issues that require monitoring in school i.e. identifying Children with Health Conditions questionnaire</p> <p>A health care plan must be devised when required in conjunction with appropriate medical practitioner, parents, guardian and Headteacher using standard forms provided by department</p> <p>Health care plans to be provided to all relevant staff</p>	

<p><b><u>Record Keeping and Communication</u></b></p> <p>No record of medicines being administered</p> <p>No tracking system for medication received in and out of premise</p>		<p>Recording forms to be used when medication is administered, which includes information such as parent consent forms, record of prescribed medicines given to a child, staff training awareness record forms</p> <p>Tracking system to be implemented to log when medication is received in and out of premises. This is to be used for every medication administered</p> <p>Tracking system should include the expiry date for medication to enable periodical checks to be carried out, unless another system has been implemented</p> <p>Procedure in place to check with parents when expiry dates are exceeded</p>	
<p><b><u>Disposal of Medication</u></b></p> <p>Medication not disposed of responsibly</p>		<p>Reminder system in place for informing parents of their responsibility of ensuring medication is not expired e.g. newsletter</p> <p>Parents responsibility to safely dispose of medication school has returned to parent</p>	

## Action Plan for Risk Assessment

Action Plan to be completed based on the findings of risk assessment. The following actions are to be undertaken to reduce the risk level as far as reasonably practical and to ensure that all of the standard controls and local arrangements are in place.

## Model letter inviting parents to contribute to individual healthcare plan development

Dear Parent

### DEVELOPING AN INDIVIDUAL HEALTHCARE PLAN FOR YOUR CHILD

Thank you for informing us of your child's medical condition. I enclose a copy of the school's policy for supporting Students at school with medical conditions for your information.

A central requirement of the policy is for an individual healthcare plan to be prepared, out what support the each Student needs and how this will be provided. Individual healthcare plans are developed in partnership between the school, parents, Students, and the relevant healthcare professional who can advise on your child's case. The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when and by whom. Although individual healthcare plans are likely to be helpful in the majority of cases, it is possible that not all children will require one. We will need to make judgements about how your child's medical condition impacts on their ability to participate fully in school life, and the level of detail within plans will depend on the complexity of their condition and the degree of support needed.

A meeting to start the process of developing your child's individual health care plan has been scheduled for xx/xx/xx. I hope that this is convenient for you and would be grateful if you could confirm whether you are able to attend. The meeting will involve [the following people]. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist and provide any other evidence you would like us to consider at the meeting as soon as possible.

If you are unable to attend, it would be helpful if you could complete the attached individual healthcare plan template and return it, together with any relevant evidence, for consideration at the meeting. I [or another member of staff involved in plan development or Student support] would be happy for you contact me [them] by email or to speak by phone if this would be helpful.

Yours sincerely

## Appendix 9 Crestwood Community School

Please complete the questionnaire below and return it to school

It is important that all children with medical conditions are supported to make sure that they are able to access their education. Some children with medical conditions may need care or medication to manage their health condition and to keep them well during the school day. Could you please complete the questionnaire below and return it to school as soon as possible so that we are able to assess your child's health needs and make arrangements to support them if necessary. In order to ensure that any medical needs are appropriately met in school we may need to discuss your child's health with the School Nursing service or another health professional who is involved in your child's care.

Name of child ..... Date of Birth .....

Home Address.....

Does your child have a medical condition/ health concern?

YES  NO

If YES please give details

Does your child have a medical condition/health concern that needs to be managed during the school day?

YES  NO

If YES please give details

Does your child take medication during the school day?

YES  NO

If YES please give details

Does your child have a health care plan that should be followed in a medical emergency?

YES  NO

If YES please give details

The above information is, to the best of my knowledge, accurate at the time of writing and I give consent to the school to discuss this information with the School Nursing service or other health professionals who are involved in my child's care.

## Appendix 10

### Suggested process for identifying children or young people with a medical condition that may require support in school

Not all children with a health condition will require a health care plan in school however the form will help schools to ascertain which children require support. In addition to this schools may be informed at any other point by a parent or health professional if a child is newly diagnosed with a health condition.

Please see sample flowchart below from the Supporting Students with medical conditions guidance
